TOTAL ANCESTRY REPORTED

Universe: Total ancestry categories tallied for people with one or more ancestry categories reported

2011 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

	Los Angeles-Long Beach-Santa Ana, CA Metro Area	
	Estimate	Margin of Error
Total:	14,664,388	+/-38,954
Afghan	11,174	+/-4,407
Albanian	1,506	+/-1,054
Alsatian	320	+/-276
American	468,590	+/-19,542
Arab:	113,793	+/-10,397
Egyptian	25,206	+/-4,567
Iraqi	3,361	+/-2,082
Jordanian	4,693	+/-1,546
Lebanese	27,523	+/-4,216
Moroccan	6,376	+/-2,421
Palestinian	4,635	+/-1,694
Syrian	12,032	+/-3,408
Arab	15,519	+/-4,510
Other Arab	14,448	+/-3,290
Armenian	214,618	+/-10,436
Assyrian/Chaldean/Syriac	3,956	+/-1,637
Australian	6,087	+/-1,491
Austrian	27,088	+/-2,960
Basque	4,368	+/-1,741
Belgian	7,147	+/-1,542

Zimbabwean	436	+/-431
African	76,638	+/-7,921
Other Subsaharan African	2,957	+/-1,316
Swedish	109,323	+/-6,598
Swiss	19,428	+/-2,666
Turkish	8,601	+/-2,560
Ukrainian	27,727	+/-3,986
Welsh	39,533	+/-4,210
West Indian (except Hispanic groups):	38,246	+/-4,983

	Los Angeles-Long Beach-Santa Ana, CA Metro Area	
	Estimate	Margin of Error
Bahamian	124	+/-149
Barbadian	289	+/-220
Belizean	15,481	+/-2,939
Bermudan	166	+/-276
British West Indian	121	+/-115
Dutch West Indian	468	+/-461
Haitian	3,246	+/-1,350
Jamaican	12,458	+/-3,428
Trinidadian and Tobagonian	2,106	+/-955
U.S. Virgin Islander	150	+/-199
West Indian	3,637	+/-1,549
Other West Indian	0	+/-208
Yugoslavian	10,220	+/-2,366
Other groups	9,359,314	+/-30,109

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Starting in 2008, the Scotch-Irish category does not include Irish-Scotch. People who reported Irish-Scotch ancestry are classified under "Other groups," whereas in 2007 and earlier they were classified as Scotch-Irish.

The American Community Survey (ACS) implemented a variety of new race and ethnicity coding changes in 2010 to be consistent with the 2010 decennial census coding rules. Any changes in ancestry estimates for 2010 and beyond should be used with caution. For more information on these changes, please see "Coding Changes to the American Community Survey Between 2009 and 2010 and Their Potential Effect on the Estimates of Ancestry Groups" on the Ethnicity and Ancestry Branch website at <http://www.census.gov/population/www/ancestry/>.

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-l' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+u' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
